

## Features

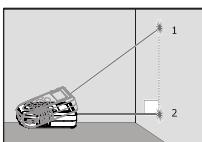

### Humanistic design

The ergonomic express enables you to measure with more flexibility, accuracy and efficiency, particularly in tight spaces. Just feel the control in your hands.

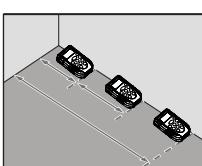

### Quick and easy to use

One person measuring with laser precision and push button simplicity.

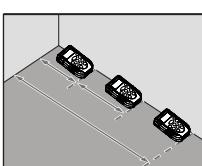

### Space calculation

Embedded two space measurement programs for area and volume

### Pythagorean function

Indirect height and width measurement at inaccessible positions.

### Tracking measurement

Locate your distance and find your position from a reference point with the tracking measurement function, it make your work easier.

## Specifications

Measure range *	0.5m to 50m
Resolution	0.001m
Accuracy	±2mm
Measure speed	0.5sec
Laser type	650nm, class2 , <1mw
Battery	9v alkaline battery
Battery working times	up to 5000 measuremen times
Dimension	104.7mm×61mm×32mm
Operation temperature	0 ~ 40°C
Storage temperature	-20 ~ 60°C
Automatic power off	
-Laser	30 seconds
-DL300	180 seconds

\* The measuring range and accuracy is depending on how well the laser light is reflected from the surface of the target and with increased brightness of the laser point to the amblent light intensity.

## Components

1. Bag
2. DL300
3. Sillca gel protector
4. Operation manual
5. Bettery(optional)
6. Safety strap
7. Belt
